As I say in the readme, I've been asked to share this. I like exmod2, as it is, so I'm happy to put it out there. I'm not so sure I understand the motivation for doing this: does it want to put an end to exmod2? Does it want to make exmod2 obsolete? Are we going to use something else? What? Q: The inheritance confusion I have the following scenario: public class GenericPerson: AbstractPerson {...} public abstract class AbstractPerson {...} The problem is that this code causes a conversion error. I have tried various permutations of generics but just can't get it right. What I really want to do is have AbstractPerson inherit from Person and have GenericPerson inherit from AbstractPerson. Any suggestions? A: Why do you need to use inheritance here? Why can't you use composition? public class GenericPerson : AbstractPerson {...} public abstract class AbstractPerson {...} Image: Darren Hauck, Deseret News The man accused of pretending to be a registered sex offender appeared in court Thursday, claiming the whole thing was a "prank" and "a joke." Twenty-three-year-old Austin Howard alleged he was set up by two college roommates, a joke that took a rather serious turn when members of the community began watching the prank unfold. Howard was arrested for impersonating a police officer and concealing identity; his roommates were arrested for producing and distributing meth. During Thursday's hearing in Magistrate Court, Howard was ordered to pay \$3,000 in restitution to Utah's Crime Victims Board, \$1,000 in restitution to the Salt Lake City Police Department and \$800 for the arrest. In addition, Howard was ordered to attend a year-long drug counseling and treatment program. If convicted, Howard could face up to a five-year prison sentence. In speaking with Mag
